INSTALLING THE NECESSARY SUPPORT SOFTWARE ON YOUR MACINTOSH

Before using Leokī 5.0 and other programs that have been translated into Hawaiian, you must install some specific software from the Leokī CD.

**Kaleidoscope** - Kaleidoscope is a Macintosh Control Panel. It must be installed on your computer and some of its options changed. You can choose the font that is displayed in your menus; this is required for you to be able to see the ‘okina and kahakō properly in the Hawaiian language programs.

**Aaron Font** - Aaron Font is a system extension that changes the default font within programs. This is required for Leokī, as this sets the default font for the Leokī desktop and other areas within Leokī.

**HI System Fonts** - This is a font suitcase that contains a number of bitmapped Hawaiian fonts that are used by Kaleidoscope and Aaron Font.

**Kinona Hua Ali‘i** - This is a font suitcase that contains a number of Hawaiian fonts that can be used on both Macintosh and Windows computers.

**Papa Pihi HI** - This is a system keyboard layout, and is meant to simplify typing of the ‘okina and kahakō on the Macintosh.

1. Open the folder Nā Pono Kāko‘o on the Leokī CD, and select Aaron Font, HI System Fonts 7/97, Kinona Hua Ali‘i, and the Papa Pihi HI. Drag them over the icon of the system folder and release. The Macintosh OS will install them in the proper locations.
INSTALLING KALEIDOSCOPE ON YOUR MACINTOSH

Kaleidoscope must be installed on your Macintosh in order for you to be able to see the ‘ōkina and kahakō in the menus of Hawaiian language programs. The Kaleidoscope installer can be found in the Pono Kākoʻo folder on your Leokī CD.

1. *Double-click on the file Kaleidoscope 2.3 Installer. When you see the Continue button, click on it.

2. Choose Kaleidoscope Easy Install from the popup menu, and click on the Install button.

3. Once the installation is complete, restart your Macintosh.

4. Go to the Control Panels (which appears under the Apple menu), and select Kaleidoscope.

5. Click on the check box to the left of Substitute System Font.

6. Click on the popup menu below Substitute System Font, and choose one of the Hawaiian fonts to be your menu font. HI Chicago and HI Veritas are good choices for the menu.

7. Close the Kaleidoscope window.

* Choose the highest version of Kaleidoscope that is available. 2.3 is the current version at the time that this document was written. The current version can always be found at:

http://www.kaleidoscope.net/
INSTALLING LEOKI 5.0 ON YOUR MACINTOSH

1. Double-click on the folder **Leoki 5 Installer** on the Leoki 5 CD, and double click on the file **Install FirstClass Client**. When you see the **License Agreement and Limited Warranty** window, read it, and then press **Continue**.

2. When you see the Install FirstClass Client dialog box, click and hold on the popup window on the left, and choose **Custom Install**.

3. Click on each of the check boxes on the left so (except for the box next to FirstClass Software) so that only the box next to FirstClass Software is selected.

4. Click on the **Install** button.

5. As soon as the installation of the FirstClass software is complete, click on the **Quit** button.
